

## **ITOP 4-2-806**

### ***ARMING DISTANCE AND IMPACT SENSITIVITY OF FUZES***

#### **SCOPE**

This ITOP describes procedures for determining arming distance and impact sensitivity of fuzes for artillery, mortar, tank and recoilless rifle fuzes and safe arming devices. Procedures apply to point detonating, mechanical and electric timing fuzes, and proximity fuzes. Graze sensitivity (trees, brush, raindrops) is also covered.
