

## **ITOP 5-2-622**

### ***GENERAL REQUIREMENTS FOR FLIGHT TERMINATION SUBSYSTEMS FOR MISSILES, ROCKETS, AERIAL TARGETS, AND UNMANNED AERIAL VEHICLES (UAVs)***

#### **SCOPE**

This document identifies the general requirements of the airborne Flight Termination Subsystem of the In-Flight Safety System and its implementation. Users are strongly urged to make provision for the mandatory system testing and monitoring functions as specified herein. This should be coordinated with the Range Safety Offices as early as practical to ensure proper recognition and interpretation of these requirements.
