

RSA-MIL-SPEC-53-1

MANUALS, TECHNICAL: (SA NAVY), PREPARATION OF

SCOPE

This specification establishes the content and format requirements for technical manuals used within the South African Navy. It also covers by reference to other specifications, standards and handbooks, the preparation of technical manuals.

1. Hardware:

This specification shall be used to prepare technical manuals for systems, subsystems or equipment.

2. Software:

The use of digital computers as the major controlling element of modern equipment and systems has led to the integration of related information into technical manuals. These manuals could include information pertaining to software and/or firmware in order to provide a satisfactory explanation of the operation, and to assist where possible, the diagnostic and maintenance processes of the equipment and/or system,
