

RSA-MIL-STD-128 Vol 1

TRAINING USER SYSTEM: GENERAL REQUIREMENTS FOR (SA ARMY)

SCOPE

1. Purpose

The purpose of this standard is to establish a uniform practice for the development of integrated training systems for the SA Army.

This standard describes the requirements for a systematic approach to training system development and covers all aspects, involving the initial concept of training system development requirements and the definition, development, production, implementation and operational support of materials and equipment required for the training of operators and logistic support personnel of a user system.

2. Application

This standard shall form the baseline for the development of training systems for the SA Army and may be used by the following parties:

- a. suppliers involved with the acquisition of products,
- b. the acquisitioner involved with the acquisition of a product system,
- c. the user (SA Army) involved with the operation and logistic support of a user system.
